OEMS Design & Support

Operational Excellence Management System—built for use, not shelf.

We architect a pragmatic management system—governance, standards, visual management and assurance—that people actually use.

INTENDED FOR

- Organizations scaling operations or integrating new sites
- Teams with existing systems that are too complex or hard to sustain

EXPECTED OUTCOMES

- Clear, simple process architecture and ownership
- Tiered visual management that drives daily improvement
- Assurance model and audits aligned to what matters

TIMELINE

- Custom depending on scope (pilot - scale)

WHAT'S INCLUDED

- Maturity scan and gap analysis
- Process map and RACI for critical routines
- Procedure simplification and document set cleanup
- Tier meetings, KPI tree and problem solving cadence
- Assurance model (self-checks, audits, management review)

DELIVERABLES

- OEMS blueprint and implementation roadmap
- Slimmed, searchable procedure library
- Operating rhythm + dashboard starter kit

Request an OEMS Quick-Scan (2–3 days)   **Prioritize value streams and governance**   **Launch a pilot area with change agents**
